Our Mission – To live lightly and to inspire

With our off-grid lifestyle, where we are striving toward the realization of more responsible and sustainable ideals - the reliance on alternative energy, the production of our own food, the stewardship of our water, the responsible disposal of our waste and a strong connected local community - our intention is that our music be a vehicle for our beliefs, hopes and aspirations. We hope that others will derive inspiration from our music and our lifestyle and endeavour to become ambassadors of a more sustainable and equitable future themselves.
